Resume

An intelligent and highly motivated individual interested in upgrading careers, who is looking for a challenging web developer position that can provide the opportunities and daily challenges that he needs. Currently holds a position as a senior software engineer developing complex software products and web applications, but craves the opportunity to go to the next level. He knows that he still has lots to learn but wants the opportunity to do it and excel. Thrives when working on new problems and products, but his current company cannot provide enough of them to keep him fully occupied. Is capable of thinking on his own feet using a mixture of common sense and logical thought and is also very effective as part of a team by being able to challenge and motivate his colleagues.

Professional Experience

Jan 2008 Intergral Information Solutions GmbH, Germany + UK
- Present: Position: Senior Software Engineer

A German company with a UK presence. Responsibilities include specifying, designing and implementing software and web products for both the company itself and external clients. The first nine months employment were based at the head office in Stuttgart in south Germany. Duties include having to rapidly learn new technologies and apply them to enhance products and services that provide the employer with a competitive advantage. Has been developing in Java and Flex 3 for the majority of his employment. The position requires analytical, time management, project planning and people skills as well as managing and motivating a small team of developers. The position requires constant "on your feet" thinking to find solutions to problems, often in areas where he has no previous experience.

Nov 2007 Digaset.com, Staffordshire
- Jan 2008: Position: Software Engineer

Exciting online Software as a Service product with the aim to rapidly develop a new digital asset management solution targetted towards the print, media and marketing industries to help them effectively manage and utilise their many digital assets. Responsible for the design, implementation and delivery of the system. As of this time, the applicaton has not been delivered due to a reorganisation of resources due to the economic conditions at the time.

Sept 2007 Travelling Europe
- Nov 2007: Position: Personal Project

June 2006 Jagex Ltd, Cambridge
- Sept 2007: Position: Software Engineer

To deliver highly respondent and scalable web applications to complement their main game offerings (runescape.com and funorb.com). Half responsible for the design and implementation of a new billing system that handles payments for the entire company (~\$6M/month) on a monthly subscription basis. Other projects included the advert management system which delivers adverts to the entire suite of products. The system delivers adverts worth approximately \$1M/month in revenue. These systems generated all the revenue streams so therefore he had direct communication with the

CEO and higher management. Greatly enjoyed the advertising system domain as it provided many challenging problems, which are still thought about to this day.

Technical Skills

Core Languages and Technologies	Skill Level				
	1	2	3	4	5
Java (JEE, Core Libraries, Web + JSP, Servers)				X	
Flex/AIR (MXML, Actionscript 3, Blaze DS, Cairngorm MVC)				X	
Ruby Language + Frameworks (Rails, Merb)			X		
PHP Language + Frameworks (Zend, Apache)			X		
Python Language + Frameworks(App Engine, Django)		X			
Objective-C	X				
Databases (MySQL, PostgreSQL, SQLServer, SQLite)			X		
Cloud Services(App Engine, Amazon EC2, EngineYard)		X			
(X)HTML + CCS + Javascript				X	
Software Tools (Eclipse, SVN, Maven, ANT)				X	
Algorithms (Data Structures, File Systems)				X	
Web Services (SOAP, REST)			X		
Mobile Development (iPhone, Android)	X
